

Classic Urethane Cable Ramps

Protect cables and hoses in temporary or permanent crossing areas.

Classic urethane cable ramps provide a simple, effective and economical solution to an expensive maintenance problem commonly encountered on mining, construction and industrial job sites.

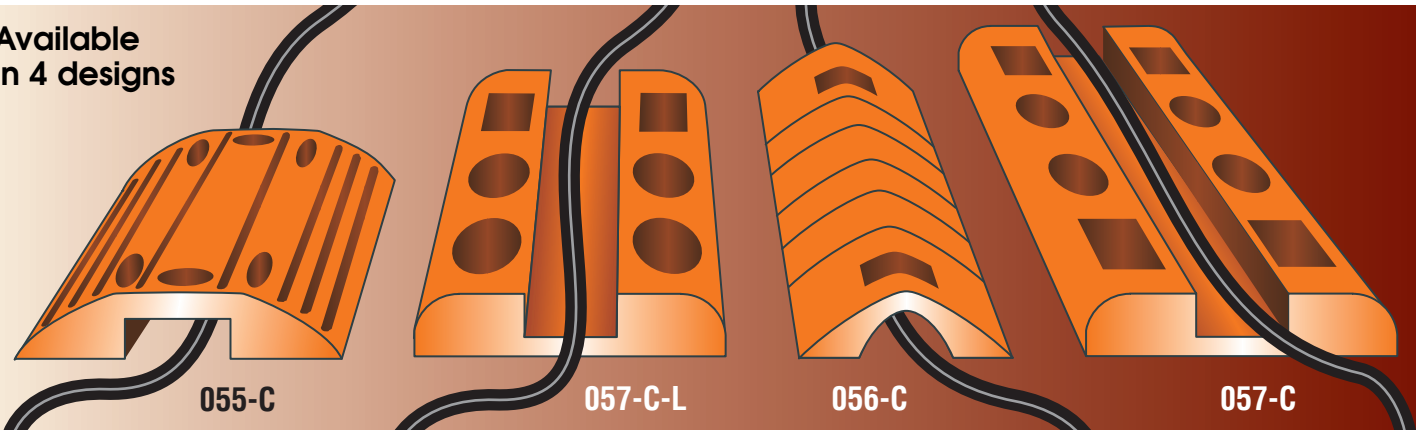

Mine cars, forklifts, trucks and other rubber-tired vehicles are extremely destructive on electric and welding cables, water lines, air hoses, drain pipes, etc.

Our nearly indestructible urethane ramps enable you to quickly set up temporary or permanent crossings to reduce your cable and hose maintenance costs and lower operating costs. These practical ramps are packed with top-quality Classic features:

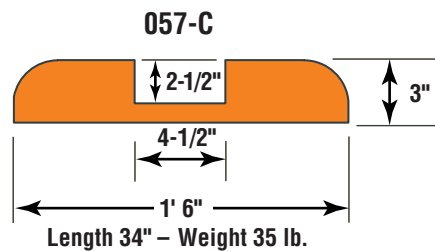

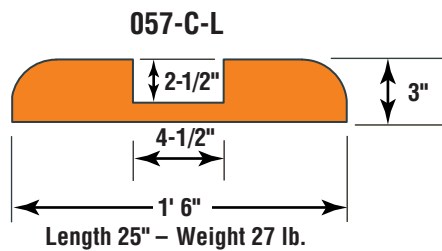

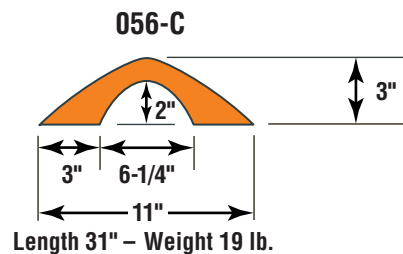

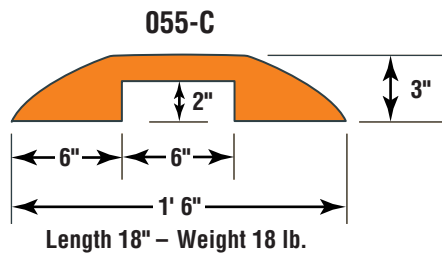

Classic Urethane Cable Ramps

Available
in 4 designs

- Made of tough, durable 65D durometer urethane
- Lightweight construction
- High visibility orange for safety
- Resistant to most oils and chemicals
- Non-conductive for electrical applications
- Excellent resiliency and low temperature flexibility
- Outstanding hydrolytic stability for wet applications
- Built-in handholds for easy moving
- Handholds double as mounting brackets
- Unique groove design provides superior traction
