

STANDARD LINE SERIES

Over time, the **Fenner Standard Line Series** has proven to meet all belt cleaning needs. The rugged construction and standard stainless steel hardware equals longer lasting cleaning in the most abusive conditions.

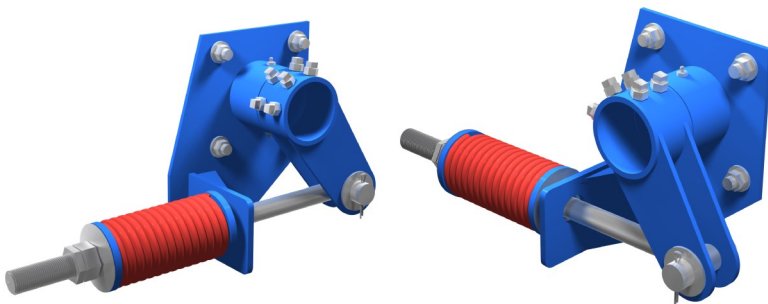

Heavy Duty V-Plow

The **Heavy Duty V-Plow** is designed to protect tail pulleys on systems conveying heavy material at high belt speeds. These applications would include but are not exclusive to: longwall mines, hard rock mines, and all heavy mining applications

Features of the **Heavy Duty V-Plow**:

- Designed to protect tail pulleys on systems conveying heavy material at high belt speeds
- Available with or without mechanical tensioners
- Double sided blade can be flipped over for 3" of wear on both sides
- All stainless steel hardware
- Heavy safety chains prevent damage from use beyond life of blade
- Designed to float up and down as well as side to side
- Easy to assemble and disassemble for transporting and installing
- Support arms made for any application

Belt Width Inches	Blade Coverage Inches	Replacement Blade Part Number	Heavy Duty V-Plow Assembly Part Number	Heavy Duty V-Plow with Mechanical Tensioners Assembly Part Number
36	48	VPBL36-1	V-36	V-36-M
42	55	VPBL42-1	V-42	V-42-M
48	62	VPBL48-1	V-48	V-48-M
54	69	VPBL54-1	V-54	V-54-M
60	77	VPBL60-1	V-60	V-60-M
72	96	VPBL72-1	V-72	V-72-M

Mechanical Tensioner — CSHSMDST-01-N/A-A

- Designed to provide adjustable tension to the cleaner
- Suited to locations that are not difficult to access
- Requires tension be monitored and adjusted as the blade wears
